

The ultimate in performance when you're in a hurry!

Product Summary

Feature	Customer advantage
Superior plain paper printing	With the new DuraBrite™ Inks, you get remarkably durable prints that are light-resistant (up to 70 years on Epson Archival Matte Paper), water-resistant (even on plain paper!), and superior double-sided output with no ink bleed-through.
Amazing performance	Optimized for desktop color printing with up to 5,000 pages per month of heavy-duty printing and up to 20 ppm black text printing*. Individual ink cartridges lower the total cost of ownership with an on-cartridge chip that monitors ink usage for the most accurate reporting, plus the cartridges can be swapped at any time.
Ultimate flexibility	Standard USB and parallel connections allow multi-platform connectivity. Optional 802.11b wireless connectivity (included with the EPSON Stylus C80WN) and optional EpsonNet External 10/100mbit Print Server allow network flexibility.
Resolution Performance Management™ (RPM)	RPM includes variable size droplet technology, automatic edge smoothing, and variable resolution printing, all of which optimizes performance and quality.
